PROFILE

Full-stack developer and **sole technical lead of KNC**, a SaaS platform in production for nurseries, senior care centres and sports clubs, used by dozens of centres and thousands of families. I own a single Flutter codebase for web, Android and iOS end to end, plus its Firebase and AWS backend: architecture, development, payments, deployments and app store releases. I care about software that holds up in production and that non-technical teams can understand and sell.

EXPERIENCE

Full-Stack Developer & Technical Lead · KNC (Kids and Clouds) — Jul 2025 – today, remote

Visasur Sistemas. The platform today: ~214,000 lines of Dart, 132 screens, 61 Cloud Functions and 5,000+ downloads on Google Play.

kidsnclouds.es · App Store · Google Play · Interactive 3D tour

- Own the **full release cycle**: TestFlight and Google Play testing through to production on App Store Connect and Google Play Console.
- Redesigned the data model **from one centre per user to many centres per user**, with per-co-admin permissions, on Clean Architecture + MVVM.
- Designed photo and video handling at scale with **direct S3 uploads and CloudFront delivery through expiring signed URLs**, plus native downloads on web, Android and iOS, with access always authenticated.
- Built **family payments with SEPA direct debits** and **centre invoicing through the Holded API**; prepared the Stripe and Fiskaly integrations.
- Built real-time messaging with scheduled sends, **access control with server-validated dynamic QR codes** and biometric sign-in with Face ID and fingerprint.
- Created the **3D sales tours in Three.js** for the three types of centre, and keep production data healthy with 100+ audit and migration scripts.

Full-Stack Developer Intern · Grupo Gartelecom — Oct 2024 – Feb 2025, Jerez de la Frontera

- Built React features and Laravel REST APIs for production applications, tested with Jest.

Backend Developer · GAZC, Seville. One-month project with Python and Django on IoT data. — Sep 2025

TECHNOLOGIES

Mobile & web	Flutter, Dart, Riverpod, React, Next.js, TypeScript, Tailwind CSS, Three.js
Backend & cloud	Firebase (Auth, Firestore, Cloud Functions, Messaging), Node.js, AWS S3 & CloudFront, Laravel
Integrations	Holded, SEPA direct debits, Stripe, Fiskaly, Google Drive API, SendGrid
How I work	Git, Crashlytics, unit and widget tests, security rules, AI-assisted development (Claude Code)

PERSONAL PROJECTS

EnglishLearnedHub · React 19, TypeScript, Firebase. English-learning platform with flashcards and games.

TheGymMondelo · Laravel, React, PostgreSQL. Full gym management platform; final diploma project. More projects with live demos in the portfolio.

EDUCATION

Higher Technical Diploma in Web Application Development · I.E.S. Doñana, Sanlúcar de Barrameda — 2022 – 2024

Prompt engineering for AI · Andalusian Digital Agency, 10 hours — Jul 2025

OTHER

Spanish (native), English (A2), driving licence (B), experienced remote worker
